apparatus for measurement of	886		
competition between penetrants	910		
concentration dependence of	885		
dual-mode	886	904	
conditioning effects	904		
generalized model	910		
permeability	909		
sorption isotherms	906		
transport model	907		
unrelaxed volume	904		
isotherms	886	902	
SO_2 absorption	391		
Spherical agglomeration, in flotation	779		
Spray contactors	344	385	
absorption in	385		
power requirements of	388		
Spray dryer absorbers	389		
Spray nozzles	140		
Spray separators, desired droplet size	140		
Standard state:			
Henry's law	11	37	
Raoult's law	11		
Steam distillation	266
